Attorneys for Trans Bay Cable LLC

**UNITED STATES BANKRUPTCY COURT
NORTHERN DISTRICT OF CALIFORNIA
SAN FRANCISCO DIVISION**

In re:

Bankruptcy Case
No. 19-30088 (DM)
Chapter 11
(Lead Case)
(Jointly Administered)

PG&E CORPORATION,

-and-

PACIFIC GAS AND ELECTRIC COMPANY,

Debtors.

**DECLARATION OF MICHAEL BLUNT
IN SUPPORT OF OBJECTION OF
TRANS BAY CABLE LLC TO
PROPOSED CURE AMOUNT IN
CONNECTION WITH SPECIAL
AGREEMENT FOR UNMETERED
ELECTRICAL SERVICE**

- ☐ Affects PG&E Corporation
☒ Affects Pacific Gas and Electric Company
☐ Affects both Debtors

[Hearing Date TBD]

** All papers shall be filed in the Lead Case,
No. 19-30088 (DM).*

I, Michael Blunt, hereby declare as follows:

1. I am employed as the Director of Operations at Trans Bay Cable LLC ("TBC"), a subsidiary of NextEra Energy Transmission, LLC. I have served as Director of Operations since 2017. I have been continuously employed in the operation and maintenance of TBC's transmission facility since 2010. As Director of Operations, I am familiar with all aspects of TBC's operations, including its retail energy usage.

2. The facts set forth in this declaration are based upon my personal knowledge or my review of relevant documents. If called upon to testify, I would testify to the facts set forth in this declaration.

3. TBC constructed, owns, and operates a 53-mile direct current electrical transmission cable buried in the San Francisco Bay. The transmission line extends from a converter station in the city of Pittsburg, CA to a similar converter station in San Francisco, CA. It provides up to approximately 40% of the peak electrical power needs of the city of San Francisco.

4. I have reviewed the *Special Agreement for Unmetered Electrical Service – Limited Exception*, dated August 7, 2017 (the “Special Agreement”) and am familiar with the methodology set forth therein for calculating TBC’s “Estimated Retail Demand.”

5. In or about July 2018, I supervised the installation of four brand new metering units to meter the consumption of the circuits that draw retail energy at TBC’s converter station in Pittsburg, CA (“Pittsburg Converter Station”) and its converter station in San Francisco, CA (the “Potrero Converter Station” and, together with the Pittsburg Converter Station, the “Converter Stations”). I provided the engineering input for the meter locations to ensure the appropriate circuits were metered. With those meters installed, TBC is able to directly measure the retail energy consumed by each Converter Station. TBC initially collected a three-month (July, August, and September of 2018) sample of meter readings to ensure accuracy and consistency, and has continued to collect usage data from the meters in each month thereafter.

6. The meter readings showed that the Estimated Retail Demand assumed in the Special Agreement is substantially larger than TBC’s actual retail energy consumption. Attached hereto as Exhibit 4 is a true and correct copy of relevant excerpts from an Excel workbook that I prepared. Exhibit 4 displays the actual retail consumption, in Kilowatt hours (kWh) of each of the Converter Stations for each month from July 2018 through April 2020. The usage data included in Exhibit 4 was downloaded directly from the meters and copied into the Excel workbook.

7. Exhibit 4 also displays the amount that TBC would have been charged for each month from July 2018 through April 2020 if charges had been based on its actual metered usage

1 rather than the Estimated Retail Demand assumption. To estimate what the monthly bill would
2 have been if it had been based on metered usage, I multiplied the metered usage by the rates set
3 forth in the applicable PG&E rate schedule (Schedule E-19-T). As Exhibit 4 shows, if PG&E had
4 applied this methodology, the total estimated amount of TBC's charges for retail energy for the
5 period from July 2018 through April 2020 would have been \$152,364.71 (\$105,046.43 for the
6 Pittsburg station plus \$47,318.28 for the Potrero station).

7 8. Exhibit 4 also shows the amounts actually billed by PG&E for unmetered retail
8 energy in each month from July 2018 through April 2020 (*i.e.*, the amounts derived from the
9 Estimated Retail Demand figures set forth in the Special Agreement). PG&E billed (and TBC
10 paid) a total amount during such period of \$423,125.47 (\$207,499.45 for the Pittsburg station plus
11 \$215,626.02 for the Potrero station).

12 9. On November 28, 2018, after TBC had reviewed and verified its three-month
13 sample of meter readings, I emailed a PG&E representative to discuss changes to the methodology
14 for measuring TBC's retail load. A true and correct copy of an email chain beginning with that
15 email is attached hereto as Exhibit 5.

16 10. On or about November 29, 2018, I had a phone call with Andrew D'Amico,
17 PG&E's account representative for the TBC accounts. As set forth in the November 29, 2018
18 email I sent to Mr. D'Amico, which is included in the email chain in Exhibit 5, the call concerned
19 TBC's "request to review the unmetered load agreement for our facility." I explained on the call
20 that TBC's meter data demonstrated that TBC was using substantially less retail energy than the
21 amount estimated in the Special Agreement. On December 14, 2018, I had a follow-up call with
22 Mr. D'Amico and Dylan Savidge of PG&E, during which I again explained the issue and
23 requested that PG&E review and revise the estimates of retail demand under the Special
24 Agreement.

25 11. In an email exchange spanning the period from December 12, 2018 to February 12,
26 2019, I sent PG&E representatives a link to access certain line drawings and technical information
27 regarding the meters installed by TBC. A true and correct copy of that email exchange is attached
28 hereto as Exhibit 6. Exhibit 6 shows that on February 12, 2019, Mr. Savidge of PG&E responded:

1 “I just spoke with our metering engineer. He has reviewed the metering information and single
2 lines and feels that we can work with this. He would like to visit both sites and it looks like he’s
3 available the week of February 25.”

4 12. On April 9, 2019, Messrs. D’Amico and Savidge visited the Pittsburg Converter
5 Station to inspect and verify the meter installed by TBC. After we discussed the issue and they
6 reviewed the meters installed by TBC, they acknowledged that the Estimated Retail Demand
7 figures in the Special Agreement overstated TBC’s actual retail energy consumption. They did
8 not dispute the accuracy of TBC’s meter readings. Mr. Savidge stated, however, that due to
9 technical incompatibilities between PG&E’s technology and TBC’s meters, PG&E would not be
10 able to draw usage data from TBC’s meters for purposes of calculating retail load. We discussed
11 potential workarounds, including installation by PG&E of its own meters at the Converter
12 Stations. They stated that they would look into such solutions and get back to me.

13 13. Having heard nothing further from PG&E, on September 13, 2019, I followed up
14 with an email to Messrs. D’Amico and Savidge asking “how your meter department is doing with
15 regards to our meter solution, and if they are able to integrate with out [*sic*] meters?” A true and
16 correct copy of that email is attached hereto as Exhibit 7. I did not receive a response to that
17 email.

18 I declare under penalty of perjury under the laws of the United States, pursuant to section
19 1746 of title 28 of the United States Code, that the foregoing is true and correct and I executed this
20 declaration on May 15, 2020 at Oakley, California.

21 /s/ Michael Blunt

Hi Michael,

Thanks for reaching out. After we spoke, I did some digging and found the Tariff Analyst (Dylan Savidge) that helped set up and get approved this contract. If you are free on Friday, 12/14 between 2:30 and 3:30, Dylan and I would like to have a phone meeting with you to continue discussions.

Are you free at this time?

Thank you,

Andrew D'Amico | Customer Relationship Manager

Hi Andrew,

I wanted to follow up with you to see if you have had a chance to review the agreement between TBC and PG&E, and if you are able to discuss metering those unmetered electrical loads? Please contact me via email or at 925-206-0483.

Best Regards,

Michael Blunt

Hi Andrew,

Thank you for giving me a call today regarding our request to review the unmetered load agreement for our facility. Please find the executed copy of this agreement attached for your review. Let me know if you have any questions, and I'll be in touch with you next week to schedule a site visit so we can sit and discuss this further.

Best Regards,

Michael Blunt

Hello Michael,

Please excuse my delay in response.

I am not in the Customer Account Relations organization. My role is to announce to customers any advance planned maintenance that will result in a temporary interruption in electric service to one or more of the customer's meters.

I have reached out to the department that manages customer account relations. You will be hearing back from Andrew D'Amico. I am confident Andrew will be able to assist you with your inquiry.

Regards,

Naomi Woerner

Hi Naomi,

I have an email from you indicating that you would be our account rep for the following accounts. TBC would like to confirm you are our point of contact and would like to schedule some time with you to discuss our unmetered accounts. Also we would like to discuss our other unmetered accounts in San Francisco that we have.

Thanks for your time, please contact me at Michael.blunt@transbaycable.com or via cell at 925-206-0483. My office hours are typically 8am – 4pm M-F, although I do have some travel planned, so email would probably be best.

CAUTION - EXTERNAL EMAIL

Hi Michael,

I just spoke with our metering engineer. He has reviewed the metering information and single lines and feels that we can work with this. He would like to visit both sites and it looks like he's available the week of February 25.

Would your folks have time for us to come visit Potrero on Friday, April 1? And we were looking at possibly Monday, Tuesday or Thursday of that week to visit Pittsburg?

If these dates don't work, please suggest other dates the following week.

Thanks.

Dylan

Hi Dylan,

Thanks. Here's the link to the MP200 Meters that we have installed, just to make sure we're on the same page. I think previously I sent a cut sheet for shark meters product line, so just wanted to make sure you had the right information. I look forward to following up with your meter techs.

Hi Dylan, and Andrew

As we discussed last week, TBC has created and invited you to collaborate on our hosted sharepoint team site. This should let you access the documents and paperwork you are looking for in order to move things forward from here. I included the cut sheet for the Shark MP200 Multi-Point metering solution we have installed and look forward to talking to your meter guys. If you have anyone who you would like to add to the team site so they have access to see the information, please let me know. Also, as contributors, you will be able to upload documents to this site as well.

Thanks, Please let me know if you have any questions or need technical assistance, and I'll be sure to get it taken care of.

Best Regards,

Michael Blunt

CAUTION - EXTERNAL EMAIL

Michael/Andrew,

Sure, a site visit would be OK with me.

Dylan

Hi Andrew, Dylan,

I think the attachments are not going through for security reasons. Would it be possible to get a file transfer, or schedule an On-site Meeting here in Pittsburg where you can review the drawing? I can provide a copy on a Flash Drive if you were to bring one with you.

Thanks,

Michael B.

CAUTION - EXTERNAL EMAIL

Hi Dylan,

We still have not received the single line drawing. Were you able to resend?

Thanks,

Andrew D'Amico | Customer Relationship Manager

Hi Dylan, Andrew,

I just wanted to check in and follow up on TBC's House power agreement... I was reviewing my email and it seems that some of my drawings did not go through. I'm trying to re-send it now.

To: [Savidge, Dylan](#); [D'Amico, Andrew](#)
Cc: [Gardner, Lenneal](#)
Subject: TBC - House Power Agreement

Hi Dylan, Andrew,

I'd like to touch base with you guys regarding how your meter department is doing with regards to our meter solution, and if they are able to integrate with our meters?

Also, I would like to provide some update information if you are able to use this information to re-negotiate the calculations in the House Power Agreement. If you are open to re-negotiating the agreement, let me know, and I will work with our attorney Lenneal to provide the data to you.

Best Regards,

Michael Blunt
